Dear Hiring Manager ,

I am writing to express my interest in the Junior Test Automation Engineer position at Coca-Cola HBC, as advertised. With a Bachelor's degree in Mechatronics Engineering from October 6 University and a strong background in software testing and automation, I am excited about the opportunity to contribute to your team.

During my academic career, I gained valuable experience in programming languages such as C, C++, and Java. I have hands-on experience with automation testing tools, including Selenium, and have developed various projects that required meticulous design, development, and integration of systems. My role as a QA engineer in a remote internship involved bug tracking and reporting, where I utilized Excel for documentation and automation testing for web applications.

I am particularly drawn to this role at Coca-Cola HBC because of the company's commitment to innovation and excellence in delivering iconic brands. I am eager to apply my skills in designing, developing, and maintaining automated test scripts using Playwright with TypeScript. I am also familiar with Agile methodologies and tools like Jira and Azure DevOps, which I believe will allow me to contribute effectively to the Group Test Management Team.

Collaboration is one of my core strengths; I enjoy working with diverse teams to achieve common goals. I am eager to learn and adapt to new technologies, and I am confident that my problem-solving abilities and attention to detail will make me a valuable asset to your team.

I look forward to the opportunity to discuss how my background, skills, and enthusiasms align with the needs of Coca-Cola HBC. Thank you for considering my application. I hope to contribute to your mission of delighting consumers around the world.

Warm regards,

Mahmoud Mohamed Bassam Alsyeed Alsalahy
